

Dear Sir:

I use XM radio just about every day in my line of work. I travel throughout a large expanse of Texas, and there is no other braodcast medium capable of reaching so far with continuous consistency.

Regional AM or FM stations contain much too much advertising, and block the attention of the message they are trying to transmit.

I urge you to permit XM to continue its ability to broadcast the news and weather and traffic updates.

Respectfully submitted,

Ken Moger
